Standard product updates for all products

Available from 5.9.2019

framery

1. Electric system OHMII Basic

For Framery O, Q and 2Q

framery

OHMI = one electric system to serve all the pods in the world.

Improvements:

- Easier to add external devices.
- Same system can be used in all products (add-in's such as control panel for VCR)
- The electric system is fully designed by Framery according to our original design

Update in effect:

- *Pods shipped from Finland factory after 5.9.2019*
- *Pods shipped from US factory during November (exact date to be announced closer to November)*

2. New ceiling lights

For Framery O, Q and 2Q

framery

New ceiling light in Framery O

All lights updated to 24V (from current 12V).

LED light strip with black aluminum frame to O. Same design as current VCR ceiling light.

Improvements in Framery O

- Design
- Higher luminance
- Improves video conference experience
- Color temperature 4000 K

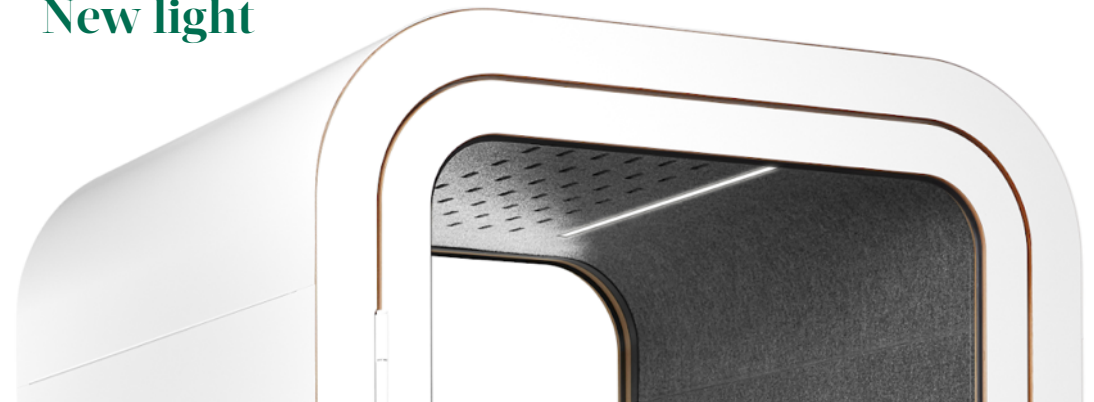

Update in effect:

- *Pods shipped from Finland factory after 5.9.2019*
- *Pods shipped from US factory during November (exact date to be announced closer to November)*

Old light

New light

New ceiling light in Framery Q and 2Q

All lights updated to 24V (from current 12V).

Ceiling light with black aluminium frame for Q and 2Q. Same ceiling lights used in both pods (1 pc in Q and 2 pcs in 2Q).

Improvements in Framery Q and 2Q

- Design
- Brighter lighting for Q
- Color temperature 4000 K

Update in effect:

- *Pods shipped from Finland factory after 5.9.2019*
- *Pods shipped from US factory during November (exact date to be announced closer to November)*

Framery Q ceiling light with motion sensor

Framery 2Q ceiling light with motion sensor in the middle

3. Aluminium door

For Framery Q and 2Q

framery

Aluminium door

Door and door frames made from aluminium for Framery Q and 2Q. Currently these are made from plywood. Minor change in frame outlook and new lock.

Improvements

- Better quality: stiffer and more durable door structure

Update in effect:

- *Pods shipped from Finland factory after 5.9.2019*
- *Pods shipped from US factory during November (exact date to be announced closer to November)*

Old lock

New lock

New options for selected products

Available from week 38 or case-by-case

framery

4. New interior option for Framery 2Q

For Framery 2Q

framery

2Q Lounge

We are launching a third interior furnishing option for Framery 2Q: 2Q Lounge. The new furnishing provides a more casual environment for meetings, a calm space to retreat to during the workday, or an area for socialization. Increase functionality to the pod by attaching a display screen or TV on the wall opposite to the sofa.

What is included?

CLINT SOFA

- Large L-sofa for 6 people
- 2 sockets attached under the sofa (Double USB Charger in first socket and two normal plugs in another socket)
- Same fabric variants as with Maggie sofa

SHELF

- White laminated plywood
- Pluto socket attached under the shelf
- Storage space and electricity for TV + other electrical equipments.

2Q Lounge

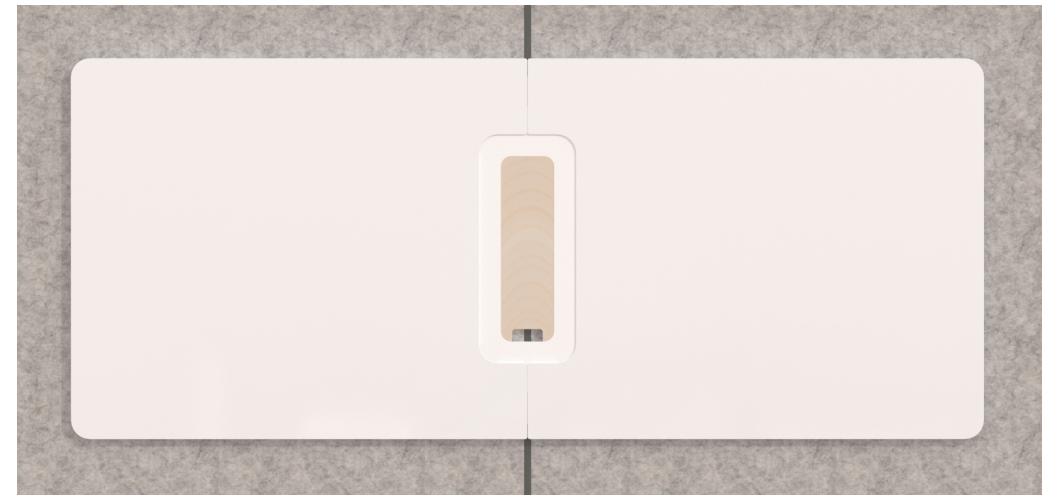

What is included?

WHITEBOARD

- Two whiteboards made of glass with cork board (1st image) included.
- Cork board is attached with magnets → easy to remove and put TV or screen on its place
- Power cord of the screen can be led through to the socket under the new felt seam list (2nd image)

ELECTRICITY

- Half of the electric system will be attached under the sofa because the new interior comes without the power column. **The power cord can be lead trough only from the floor level.**
- Power cord will be attached to the power unit which is located under the sofa.
- Power unit spreads the electricity under the sofas to the sockets and to lower voltage components to the roof (lamps etc.).
- Power to the roof will be lead through under the felt seam list behind the sofa.

2Q Lounge

What is included?

PIAGGIO TABLE

- Space for your laptop and ensures more ergonomic working.
- The tabletop is laminate, the leg is made from steel.

UI PANEL PLACEMENT

- UI panel is located above the sofa on the side frame next to the handle.
- Power for the panel is lead through the aluminium side frame.

Option available:

- *C-category lead time case-by-case (first shipments from factory during week 40)*
- *Technical specifications can be found from new interior product card.*

5. Wireless charger

For Framery O and Q

framery

Qi certified wireless charger for Framery O and Q

Wireless charger was introduced in Neocon.

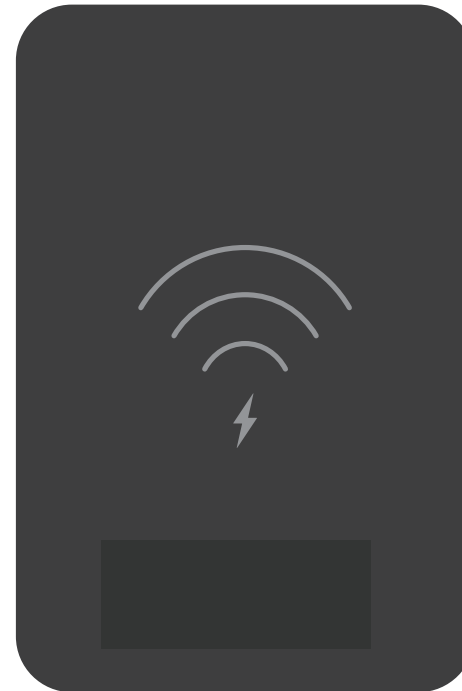

Wireless charger add-on is available on wide and VCR -tables for O.

For Q plan is to enable the option for Meeting Maggie and Working with PAL.

Option available:

- *B-category, lead time 6 weeks - first shipments from factory during week 38*

Wireless charger sticker

6. Whiteboard paint

For Framery O, Q and 2Q

framery

Whiteboard paint for Framery O, Q and 2Q

Whiteboard paint is new option for our exterior steel sheets.

Whiteboard paint available only RAL9016 (White Glossy).

Sheets with this option will be labeled with a sticker. The sticker will be found on whiteboard sheets (size approximately 4x4 cm).

Option available:

- *C-category lead time case-by-case*

Whiteboard sticker

7. Booking system bracket

For Framery Q and 2Q

framery

Booking system bracket for Framery Q and 2Q

Q and 2Q will have an option for universal booking system bracket. The booking system bracket is attached to the door locking plate. The surface material for the booking system bracket is plywood. Bracket set includes 2 plywood plates; small and large. Customer can choose either small plate or large plate depending on the booking system they have in use.

Customer has to acquire booking systems and suitable booking system cover themselves and attach cover to the bracket by screwing.

NOTE: We do not provide holders or booking systems, only a bracket where booking systems can be attached to.

Option available:

- *B-category, lead time 6 weeks - first shipments from factory during week 38*
